
SG1660

Ecoline compact alarm system, siren

You can install the Ecoline compact alarm system siren inside and outside of your building. This professional signalling unit is the critical module of a completely functioning alarm chain.

The Ecoline compact alarm system siren is an acoustic signal generator. When an alarm is triggered, it generates an extremely loud signal tone with more than 110 dB of acoustic pressure.

The weather-proof aluminum housing (IP 34) of the alarm siren is protected against sabotage by a wall and cover contact and by an additional inside grating.

The siren is powered with 12 V (external). the maximum current consumption is 350mA.

Product highlights:

- Protection class IP34
 - Acoustic pressure: 110dB
 - Sabotage alarm for breaking of seal and opening
 - Siren and flashing light controlled separately
-

Ecoline compact alarm system, siren

Technical Data

Degree of protection	IP34
Volume	110 dB
Emergency power supply	no
Emergency power battery	no
Temperature range	–25 to +55°C
Sabotage monitoring	Wall/ceiling
Lamp type	–
Flashing frequency	–
Operating voltage	12 VDC
Current consumption, standby	–
Current consumption, alarm	350mA
Power consumption	4.1W
Dimensions (WxHxD)	190x210x115 mm
Weight	1,700g
